

Demonstration of Proposed Features

Date	2 July, 2026
Team ID	
Project Name	Rising Waters – AI Based Flood Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features proposed during the project planning phase and verifies whether they were successfully implemented and demonstrated in the Credit Card Approval Prediction system.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Weather Data Input	Accepts weather data.	Implemented	Yes	Successfully accepts user input for prediction.
2	Data Preprocessing	Cleans missing values, encodes categorical variables, and scales features before prediction.	Implemented	Yes	Improves model performance.
3	Machine Learning Flood Prediction	Predicts whether flood risk is High or Low using the trained machine learning model.	Implemented	Yes	XGBoost model integrated successfully.
4	Prediction Result Display	Displays flood prediction results instantly on the web application.	Implemented	Yes	Provides real-time prediction results.
5	Model Performance Evaluation	Evaluates the trained model using Accuracy, Precision, Recall and F1-Score.	Implemented	Yes	Performance metrics displayed successfully.

6	Flask Web Application Deployment	Integrates the trained model into a Flask-based web application for real-time use.	Implemented	Yes	Successfully demonstrated end-to-end workflow.
