Empathy Map

This empathy map represents the perspective of a **Disaster Management Officer / Weather Analyst** using the Flood Prediction System. It helps understand the user's needs, concerns, actions, and emotions to provide timely and accurate flood predictions.

SAYS	THINKS
• I need accurate flood predictions. • I want early flood warnings. • The system should be simple to use.	• Will the prediction be reliable? • Can this help reduce disaster impact? • Are the weather inputs sufficient for prediction?
PERSONA NAME Disaster Management Officer / Weather Analyst	
DOES	FEELS
• Enters weather parameters into the system. • Monitors flood prediction results. • Takes preventive actions based on predictions.	• Concerned during heavy rainfall. • Confident if the prediction is accurate. • Relieved when timely warnings help protect people.
